Appl. No.

10/705,748

Filed

November 10, 2003

REMARKS

In the Office communication mailed June 21, 2006, the Examiner stated that the application includes the following three inventions:

- -- Group I: Claims 1-23 and 27-29, drawn to an apparatus, classified in class 425, subclass 548;
- -- Group II: Claim 25, drawn to a process, classified in class 264, subclass 328.1; and
- -- Group III: Claim 26, drawn to an article, classified in class 428, subclass 35.7.

However, Examiner did not indicate under which of the three groups Claim 24 should be classified. Since Claim 24 depends from Claim 22, it is Applicants' opinion that, under the Examiner's classification system, Claim 24 should also be classified under Group I.

In response to the Examiner's communication of June 21, 2006, Applicants elect without traverse to proceed with the examination on the merits of Group I, which includes Claims 1-24 and 27-29, without prejudice or disclaimer of the non-elected claims. Again, please note that, as discussed above, Claim 24 has been included in Group I.

Applicant respectfully submits that the foregoing remarks are fully responsive to the Restriction Requirement in the Office communication mailed June 21, 2006. If, however, any undeveloped issue remains, the Examiner is respectfully requested to call Applicants' counsel at the number provided below in order to resolve such issue.

Please charge any additional fees, including any fees for additional extension of time, or credit overpayment to Deposit Account No. 11-1410.

Respectfully submitted,

Dated: 20 July 2006

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-23 and 27-29, drawn to an apparatus, classified in class 425, subclass 548.
- II. Claims 25, drawn to a process, classified in class 264, subclass 328.1.
- III. Claim 26, drawn to an article, classified in class 428, subclass 35.7.

The inventions are distinct, each from the other because of the following reasons:

- 2. Inventions I and III are related as apparatus and product made. The inventions in this relationship are distinct if either or both of the following can be shown: (1) that the apparatus as claimed is not an obvious apparatus for making the product and the apparatus can be used for making a materially different product or (2) that the product as claimed can be made by another and materially different apparatus (MPEP § 806.05(g)). In this case the apparatus can be used for making a materially different product such as a paint can; also, the product can be made by another and materially different apparatus such as a compression mold.
- 3. Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another and materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to practice another and materially different process such as compression molding.

Application/Control Number: 10/705,748

Art Unit: 1732

4. Inventions II and III are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make another and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by compression molding.

- 5. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.
- 6. Because these inventions are independent or distinct for the reasons given above and the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.
- 7. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
- 8. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not

Application/Control Number: 10/705,748

Art Unit: 1732

distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

9. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jill L. Heitbrink whose telephone number is (571) 272-1199. The examiner can normally be reached on Monday-Friday 9 am -2 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Christina Johnson can be reached on (571) 272-1176. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
